

New Jersey Coastal Resilience Collaborative (NJCRC)
Field Site Visit Workgroup - 18-Month Workplan (January 2025 – May 2026)

Purpose Statement:

Many of the workgroups within the NJCRC have expressed an interest in developing field site visits to supplement their on-going discussions. It is generally agreed upon that stakeholder discussions in the field has the ability to advance conversations by improving stakeholder understanding of restoration techniques, site impairments, and other topics critical to coastal resilience. The Field Site Visit Workgroup is charged with organizing and implementing site visits to coastal locations (completed restoration projects, preservation and/or ecological important areas, impaired sites, etc.) that support the efforts and goals of the other workgroups within the NJCRC.

Goals:

- Host 3-4 field site visits annually
- Work with the existing workgroups within the NJCRC to ensure the scheduled site visits are relevant and support the workgroup goals
- Add 1-2 additional volunteers to the Workgroup

Activities/Events:

- Spring 2025 Site Visit (TBD)
- Summer 2025 Site Visit (TBD)
- Fall 2025 Site Visit (TBD)
- Spring 202 Site Visit (TBD)
